Allowable Subject Matter

Claims 47-75 are allowable. The restriction requirement between the species A-D as set forth in the Office action mailed on 1/16/07, has been reconsidered in view of the allowability of claims to the elected invention pursuant to MPEP § 821.04(a). **The restriction requirement is hereby withdrawn as to any claim that requires all the limitations of an allowable claim.**

Claims 60, 62-63 directed to the non-elected species are no longer withdrawn from consideration because the claim(s) requires all the limitations of an allowable claim.

In view of the above noted withdrawal of the restriction requirement, applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

Once a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 443 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

The following is an examiner's statement of reasons for allowance:

Regarding independent claim 47, as amended, Examiner agrees with Applicant's arguments. See page 8 of the Response filed March 16, 2009.

The prior art fails to teach or fairly suggest, in addition to the accompanying features of the claim, the following in italics:

An apparatus suitable for controlling the size and the phase of an electromagnetic beam, the apparatus comprising: a. a substrate; and b. a vertically Graded Refractive index (vGRIN)

Art Unit: 2883

multilayer structure deposited on the substrate, the multilayer structure including a vGRIN film and a *curved input sidewall and a curved output sidewall*, the input sidewall being a sidewall on which the electromagnetic beam is incident on the apparatus, the output sidewall being a sidewall through which the electromagnetic beam leaves the apparatus, wherein the apparatus is used to independently control a vertical focusing and a horizontal focusing of the electromagnetic beam, *wherein the vGRIN film has a refractive index distribution $n(y)$, where y is a vertical direction substantially perpendicular to the direction of propagation of the electromagnetic beam.*

Claims 48-75 are allowable by virtue of their dependency.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to ERIN D. CHIEM whose telephone number is (571)272-3102. The examiner can normally be reached on Monday - Thursday 9AM - 5PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Frank G. Font can be reached on (571) 272-2415. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
